PHYSICS

Foundation Tier Paper 2

Friday 15 June 2018

Time allowed: 1 hour 45 minutes

Materials

For this paper you must have:

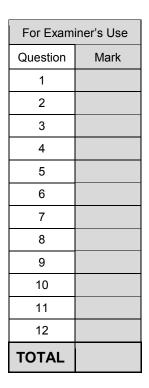

- a ruler
- a scientific calculator
- the Physics Equation Sheet (enclosed).

Instructions

- Use black ink or black ball-point pen.
- Fill in the box at the top of this page.
- Answer **all** questions in the spaces provided.
- Do all rough work in this book. Cross through any work you do not want to be marked.
- In all calculations, show clearly how you work out your answer.

Information

- The maximum mark for this paper is 100.
- The marks for questions are shown in brackets.
- You are expected to use a calculator where appropriate.
- You are reminded of the need for good English and clear presentation in your answers.

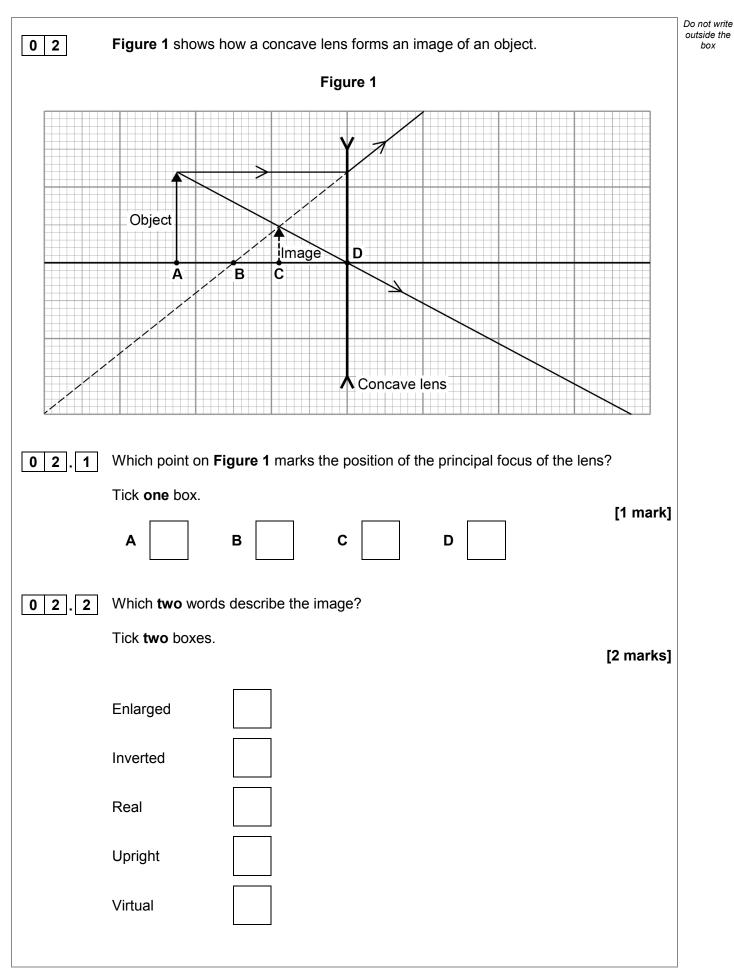

0 1.1	The Sun is a star.	Do not write outside the box
	Which galaxy is the Sun in?	
	Tick one box.	
	[1 mark]	
	Cartwheel	
	Milky Way	
	Starburst	
	Tadpole	
0 1.2	Light takes 500 seconds to travel from the Sun to the Earth.	
	Light travels at 300 000 kilometres per second.	
	Calculate the distance between the Sun and the Earth.	
	Use the equation: distance = speed × time [2 marks]	
	Distance =kilometres	

	Table 1 gives inform	nation abou	t some of the planets in our solar systen	٦.	Do not write outside the box
	The planets are in order of increasing distance from the Sun.				
			Table 1		
		Planet	Time to orbit the Sun in years		
		Mercury	0.2		
		Venus	0.6		
		Earth	1.0		
		Mars			
		Jupiter	12.0		
0 1.3	There are some pla	nets in our	solar system missing from Table 1 .		
	How many planets a	are missing	?	[1 mark]	
				נו וומואן	
0 1.4	Estimate how many	years it tak	es Mars to orbit the Sun.	[4 mork]	
				[1 mark] years	
0 1.5	Calculate how many	/ times Ven	us will orbit the Sun in 9 years.		
				[2 marks]	
	In 9) years Ven	us will orbit the Sun	times.

					1

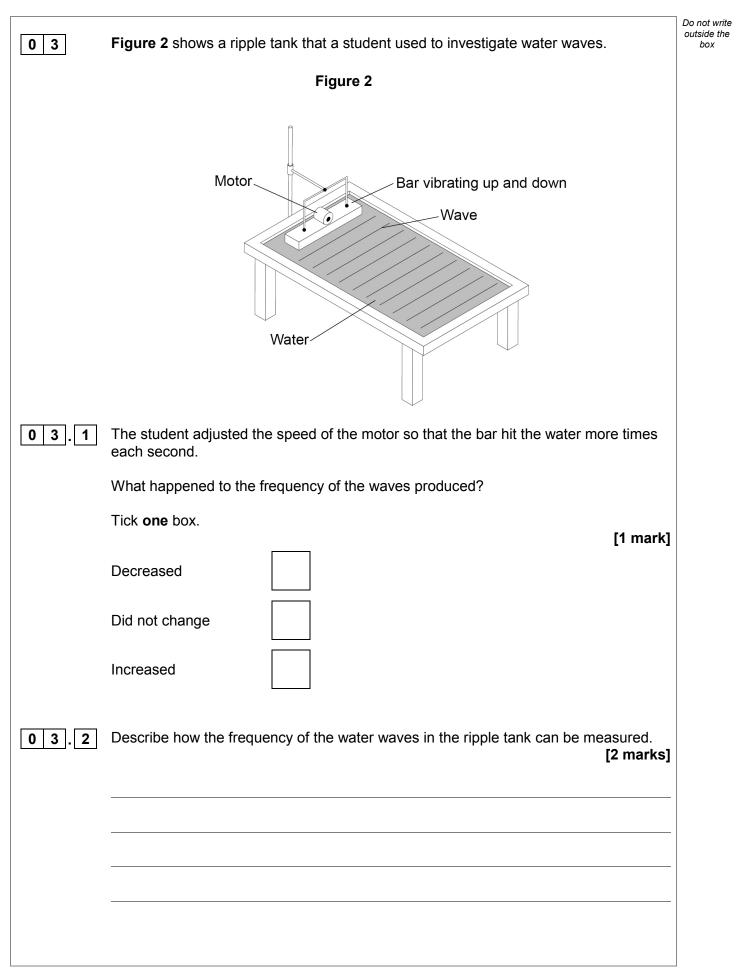

02.3	Calculate the magnification produced by the lens. Use the equation: magnification = $\frac{\text{image height}}{\text{object height}}$ [4 marks]	Do not write outside the box
	Magnification =	
02.4	Complete the sentence. Choose an answer from the box. [1 mark]	
	decrease increase not change	
	As the object is moved further away from the lens, the size of the image will	8
	Turn over for the next question	

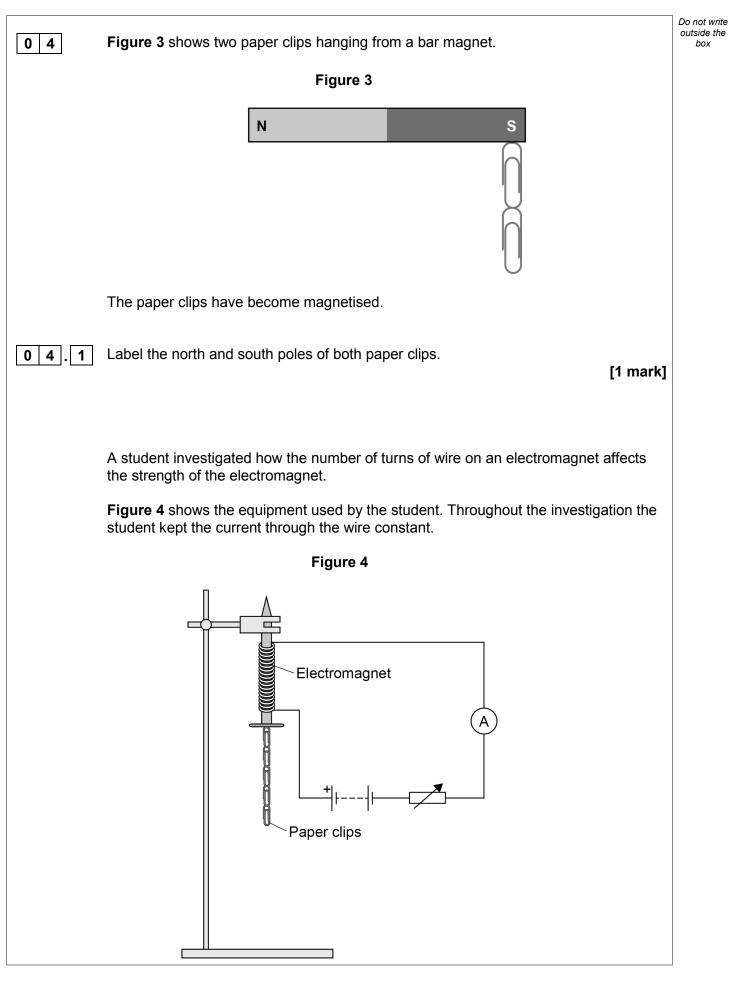

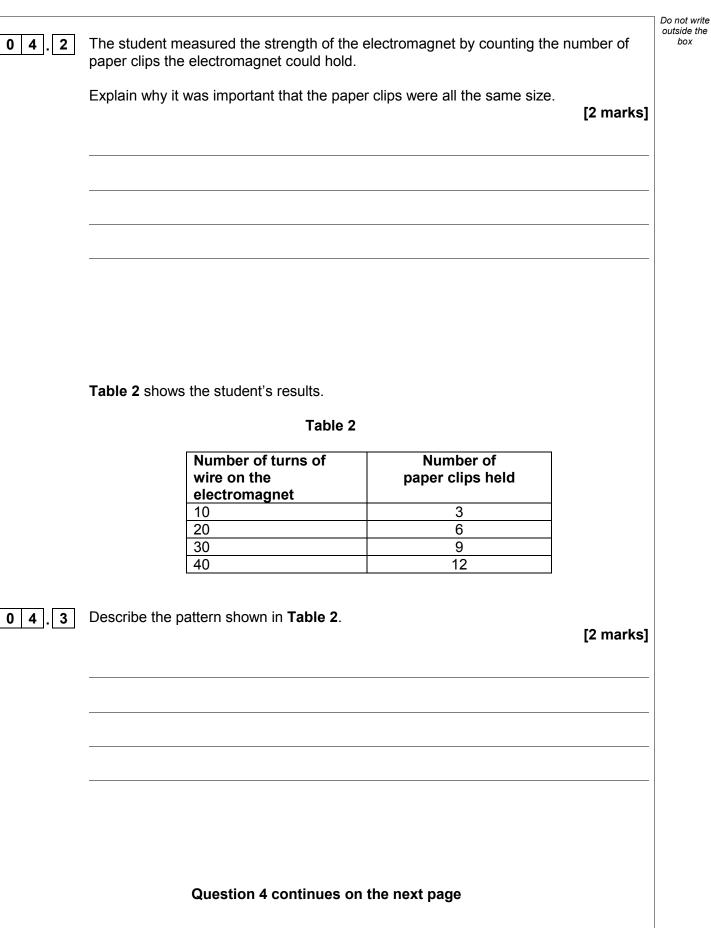

03.3	The student mea	asured the frequency of the w	ater waves as 5 hertz.		Do not write outside the box
	Calculate the period of the water waves.				
	Use the equation	n:			
		period = $\frac{1}{\text{free}}$	1 quency		
	Choose the unit				
	metres	metres / second	seconds		
				[3 marks]	
		Period =	Unit		
					6

04.4	The student then used 50 turns of wire on the electromagnet.	Do not write outside the box
	The electromagnet picked up 18 paper clips. This was more paper clips than the student had expected.	
	Which one is the most likely cause of this result?	
	Tick one box.	
	[1 mark]	
	The paper clips used with 50 turns were larger than the others.	
	There were less than 50 turns of wire on the electromagnet.	
	Some of the paper clips were already magnetised.	
04.5	The student repeated the measurement for 50 turns of wire three more times.	
	This gave her the following set of results.	
	18 16 14 15	
	Explain what the student should now do with the four results for 50 turns of wire. [3 marks]	

04.6	The student wrote the hypothesis:	outside the box
	'Increasing the current through the wire will make the electromagnet stronger.'	
	Describe how the student should change the investigation to test this hypothesis. [3 marks]	
		12
	Turn over for the next question	
	Turn over ►	

Do not write

	A student wears a white T-shirt and a red baseball cap to a party.	Do not write outside the box
0 5.3	Why does the T-shirt look white in white light? [1 mark]	
0 5.4	Explain how the colour of the baseball cap appears to change when the room lights at the party change from white to blue. [2 marks]	
	Question 5 continues on the next page	
	Turn over ►	

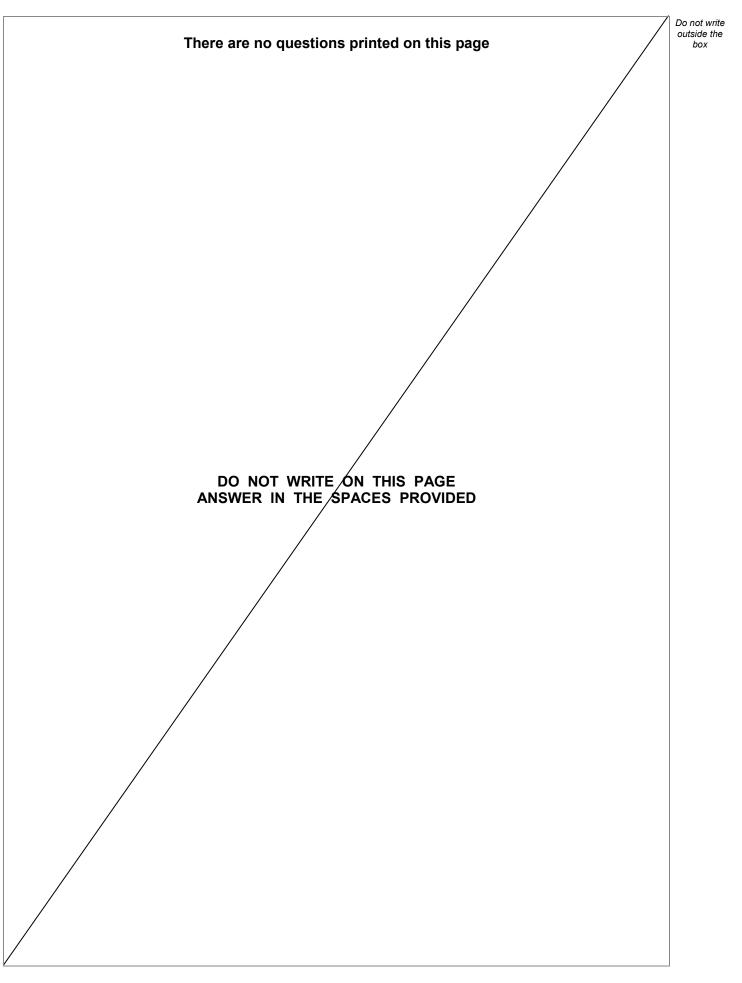

Do not write outside the A student investigated how the type of surface affects the amount of infrared radiation box the surface absorbs. Figure 6 shows the equipment that the student used. Figure 6 Matt black Shiny silvered surface surface Wax Drawing pin Metal sheet Metal sheet Infrared heater The metal sheets absorb infrared radiation. The wax melts and the drawing pins fall off the surfaces. 0 5 . 5 In the investigation there are several variables. Draw **one** line from each variable to the correct description of that variable. [2 marks] Variable Description Control Distance from the metal sheets to the infrared heater. Dependent The surface colour of the metal sheets. Independent Time taken for the drawing pins to fall off.

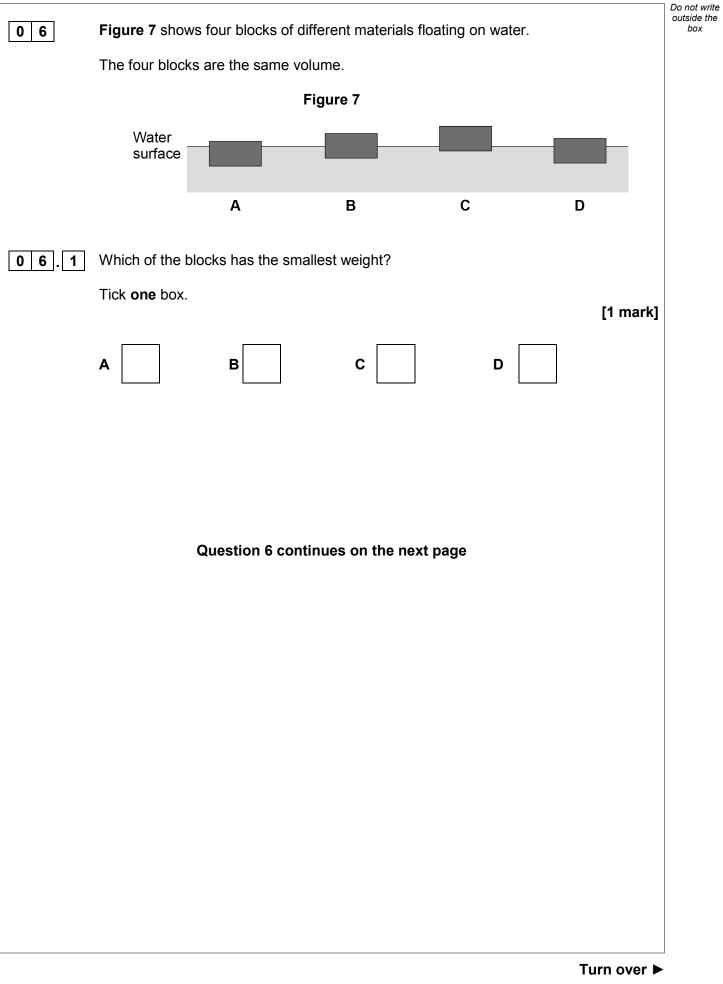

IB/G/Jun18/8463/2F

0 5.6	What is the main hazard in this investigation? [1 mark]	Do not write outside the box
0 5.7	The drawing pin attached to the matt black metal sheet fell off first. What can be concluded from this result?	
	[1 mark]	
		9

	Turn over ►	

		Do not write
06.3	When thrown into the water the lifebuoy floats. The two forces acting on the lifebuoy are the weight of the lifebuoy downwards and upthrust upwards.	outside the box
	How big is the upthrust on the lifebuoy compared to the weight of the lifebuoy?	
	Tick one box.	
	[1 mark]	
	The upthrust is greater than the weight.	
	The upthrust is less than the weight.	
	The upthrust is the same as the weight.	
06.4	Write down the equation which links acceleration, mass and resultant force. [1 mark]	
0 6.5	A rope is used to pull the lifebuoy to the side of the swimming pool.	
	A resultant force of 4.0 N acts on the lifebuoy.	
	The mass of the lifebuoy is 2.5 kg.	
	Calculate the acceleration of the lifebuoy. [3 marks]	
		8
	Acceleration = m/s ²	
	Turn over ►	

		Do not write
0 7	Figure 9 shows a fork-lift truck lifting a heavy crate.	outside the box
	Figure 9	
0 7.1	The crate weighs 11 500 N and is lifted vertically 2.60 m.	
	Calculate the work done to lift the crate.	
	Use the equation: work done = force × distance [2 marks]	
	Uork done = J	

	The weight of the crate causes a clockwise moment of 13 800 Nm about the centre of the front wheel of the fork-lift truck.	Do not write outside the box
0 7.2	The weight of the fork-lift truck and driver cause an anticlockwise moment.	
	What is the minimum size of the anticlockwise moment needed so that the fork-lift truck does not topple over? [1 mark]	
07.3	Write down the equation which links distance, force and moment of a force. [1 mark]	
07.4	Calculate the distance 'd' marked on Figure 9. [3 marks]	
	Distance ' d ' =m	
		7
	Turn over for the next question	

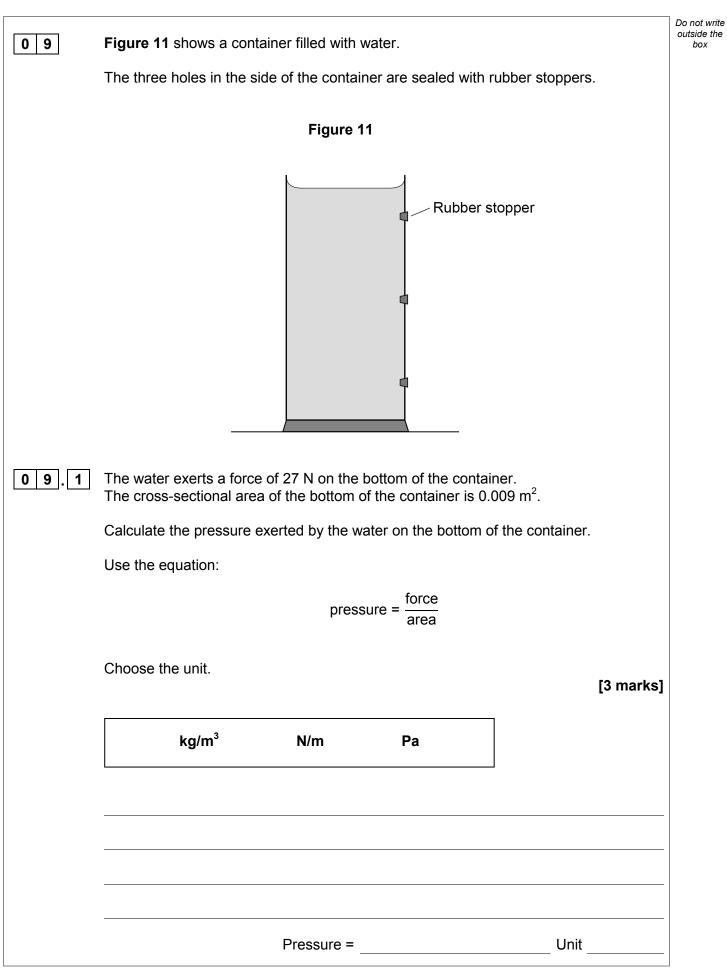

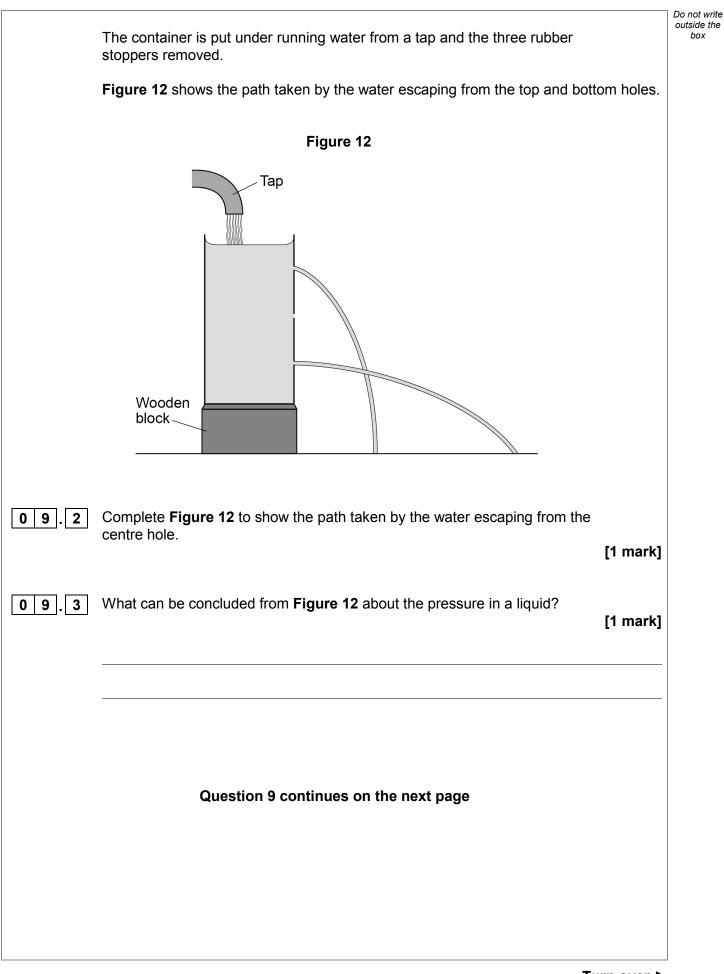

0 8.4	Having an X-	Having an X-ray taken exposes a person to ionising radiation.				
	Table 3 gives upper digestimes	s the average radiation dos ve system.	se for an X-ray of the che	est and an X-ray of the		
	Table 3					
		Part of the body	Radiation dose in millisieverts (mSv)			
		Upper digestive system Chest	<u>5.0</u> 0.1			
		Cheer	0.1	I		
	The risk of an X-ray causing cancer is about 1 in 20 000 for each mSv of radiation received. Compare the risk of developing cancer from having an X-ray of the upper digestive					
		he risk from having an X-ra				
	Use the data	in Table 3 .		[2 marks]		
Turn over for the next question						

Do not write outside the box

25

		Do not write outside the
1 0.3	The ball and the Earth form a system.	box
	What is meant by 'a system'?	
	Tick one box.	
	[1 mark]	
	A group of objects that interact.	
	Objects with big differences in mass.	
	Objects with gravitational potential energy.	
10.4	When the ball hits the ground, energy is transferred from the ball to the Earth.	
	Explain how the data in Figure 14 shows this energy transfer. [4 marks]	
		8
	Turn over for the next question	

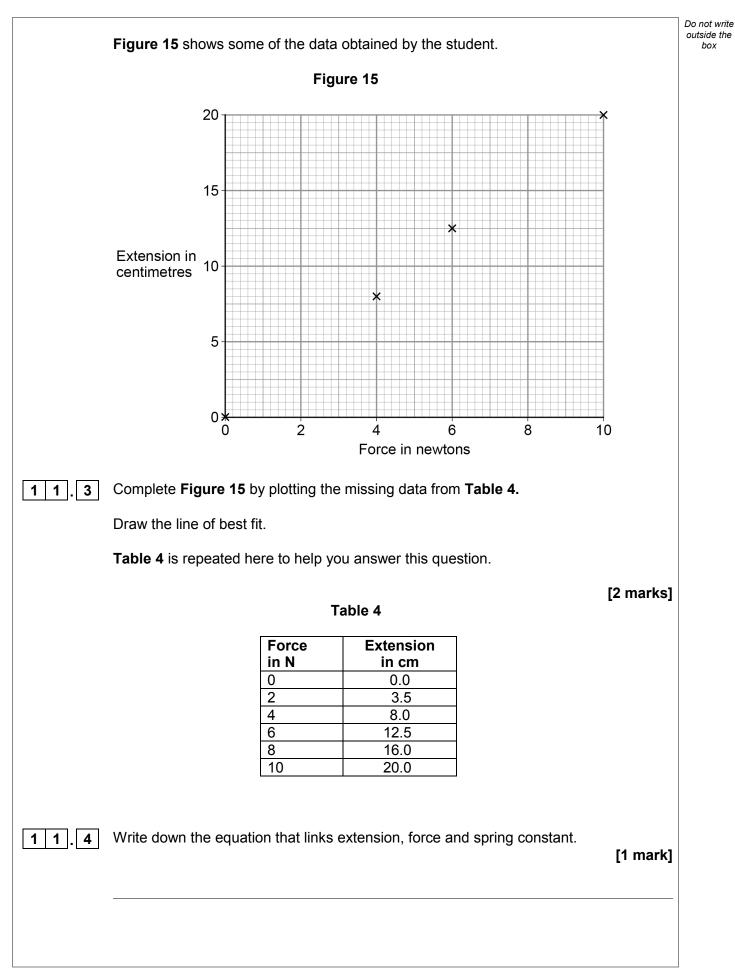

1 1	A student carried out an investigatio	n to determine	the spring constant of a spring	Do not writ outside the box
			, the spring constant of a spring.	
	Table 4 gives the data obtained by t			
	Table 4			
	Force in N	Extension in cm		
	0	0.0		
	2	3.5		
	4	8.0	_	
	6	12.5	_	
	8	16.0	_	
	10	20.0		
	Describe a method the student soul	d have used to	estain the data siven in Table 4	
1 1.1	Describe a method the student could	d nave used to	o obtain the data given in Table 4.	
	Your answer should include any cau	use of inaccura	acy in the data.	
	Your answer may include a labelled	diagram.		
			[6 marks]	
]

1 1.2	The student measured the extension for five different forces rather than just measuring the extension for one force.					
	Suggest why.	[1 mark]				
	Question 11 continues on the next page					

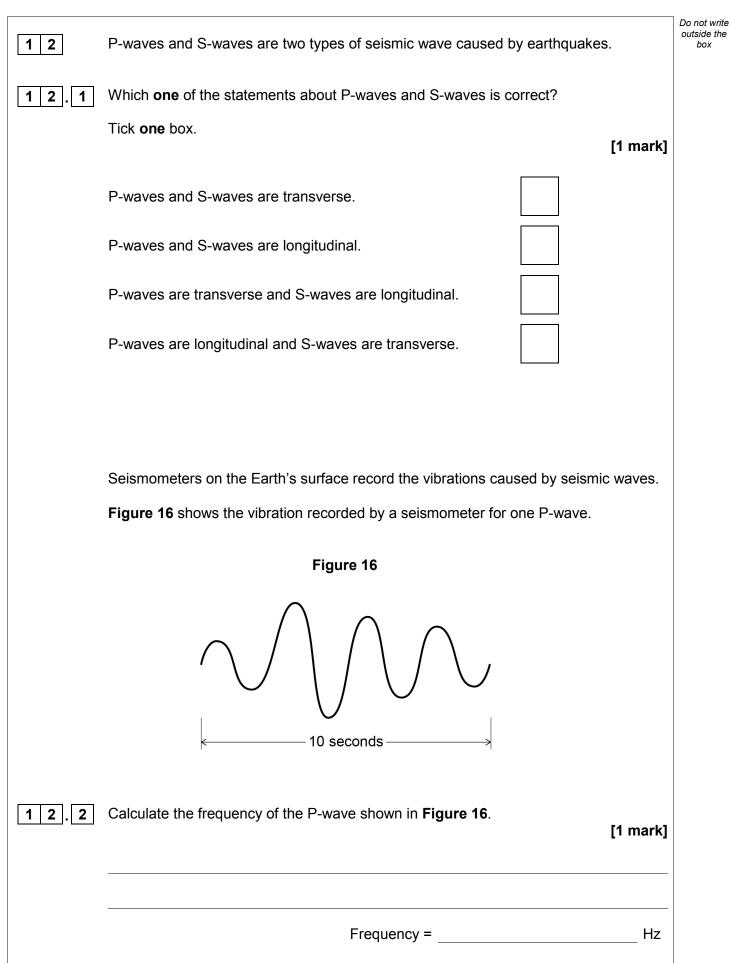

Turn over ►

1 1.5	Calculate the spring constant of the spring that the student used.	Do not write outside the box
	Give your answer in newtons per metre.	
	[4 marks]	
	Spring constant = N/m	
1 1.6	Hooke's Law states that: 'The extension of an elastic object is directly proportional to the force applied, provided the limit of proportionality is not exceeded.'	
	The student concluded that over the range of force used, the spring obeyed Hooke's Law.	
	Explain how the data supports the student's conclusion. [2 marks]	
		16
	Turn over for the next question	

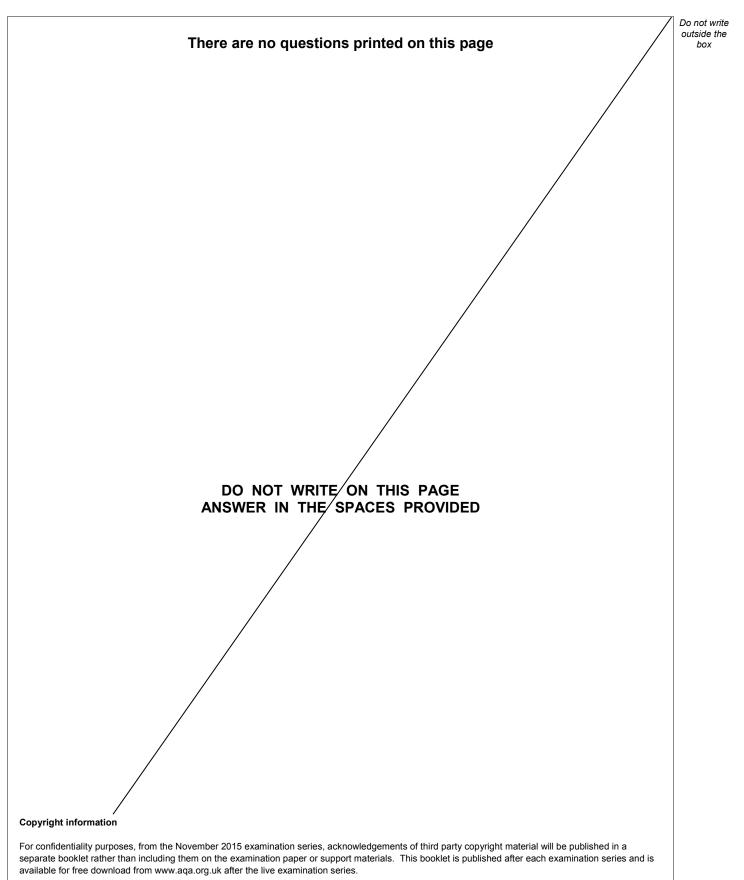

12.3	Write down the equation which links frequency, wavelength and wave speed. [1 mark]	Do not write outside the box
12.4	The P-wave shown in Figure 16 is travelling at 7200 m/s. Calculate the wavelength of the P-wave. [3 marks]	
	Wavelength = m	
12.5	Explain why the study of seismic waves provides evidence for the structure of the Earth's core. [2 marks]	
		8
